# How to Operationalize Your Risk Assessments

# Today's speakers

**Abhay Shah**
Head of Tech & InfoSec Risk and Compliance
Doordash

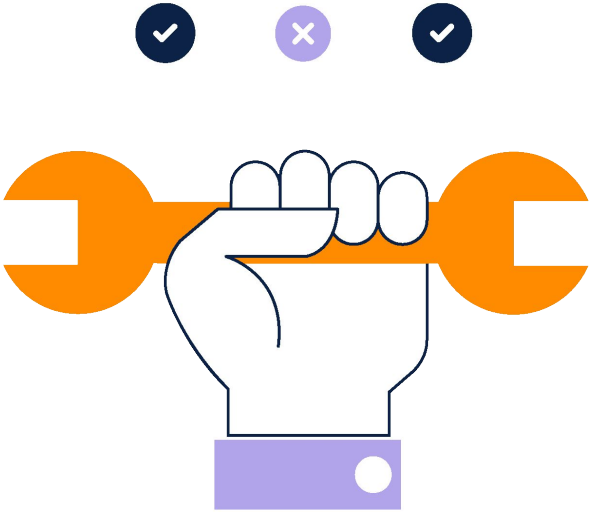
**Kayne McGladrey**
Field CISO
Hyperproof

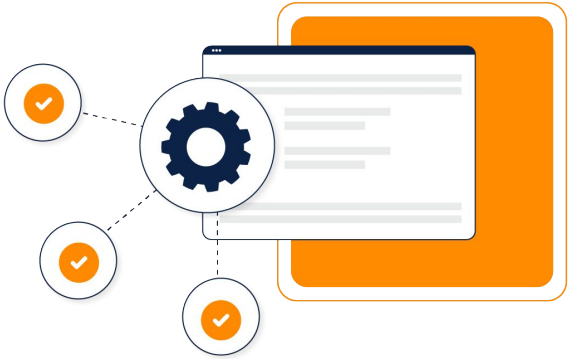
# On the agenda

1. Why we're here today
2. First, get organized
3. Next: execute your plan
4. Last: prioritize your risks

# Why We're Here Today

# You want to operationalize your risk assessments





# You might be concerned about the SEC's new disclosure requirements ...

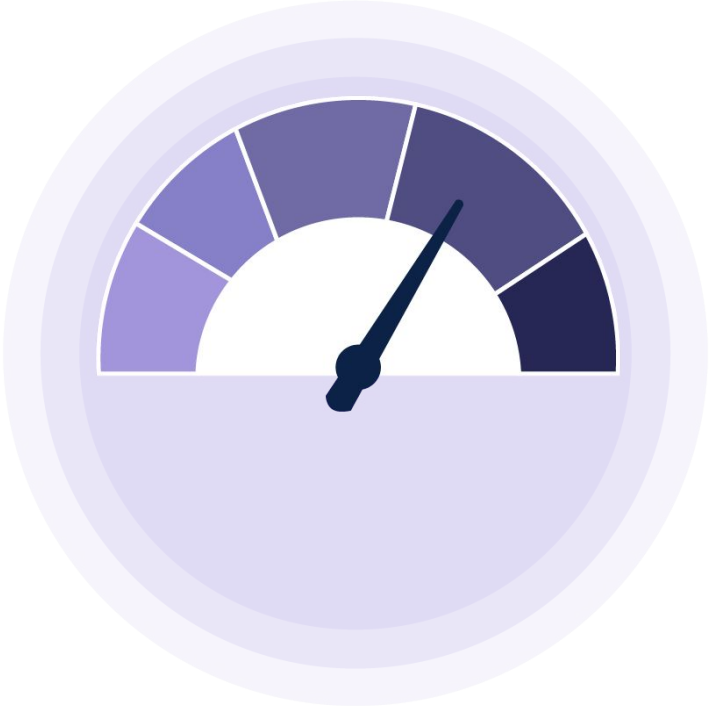
# … and how much additional work they'll require

# Let’s talk about how to truly operationalize and uplevel risk assessments

# First: Get Organized

# Create a strategy

# Conduct a self-assessment of your cybersecurity maturity



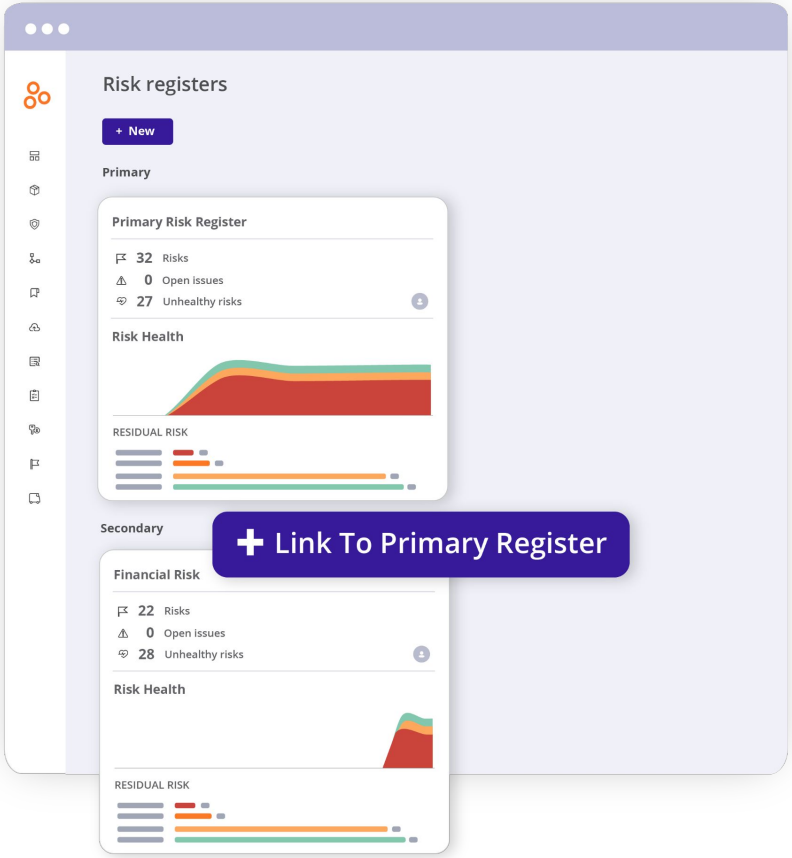
# Make an action plan

# Next: Execute Your Plan

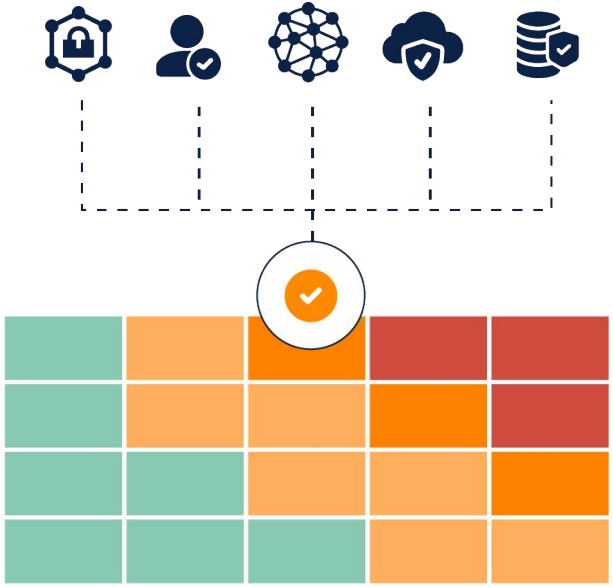
# Document, evaluate, and communicate

# Understand your technical environment

# Build an inventory of your risks and risk owners

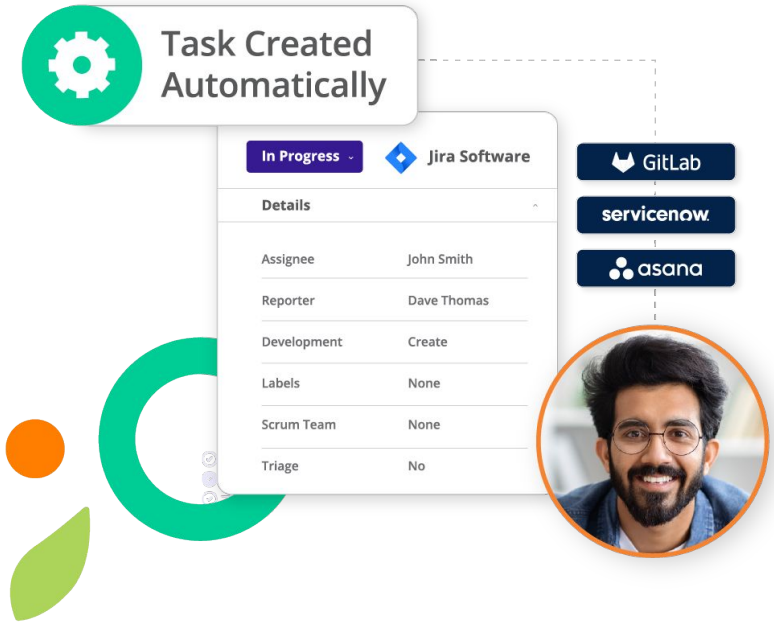


# Last: Prioritize Your Risks



Score your risks by impact, likelihood, revenue, etc.

# Engage your risk owners



# Expedite the process with GRC software

# Thank you!
